MAINTENANCE CORNER

RATE-YOUR-MAINTENANCE

If the Maintenance Team has recently completed work in your apartment home, do not forget to fill out your “Rate Your Maintenance” card. Return it back to the office for your chance to win a $25 gift certificate to the downtown New Haven business of your choice. January’s Rate-Your-Maintenance winners are Taft Resident Veysel Umman and Angel Berrios from our Maintenance team.

Important Reminders

- If you are not planning to renew your lease, stop by the office or visit the Resident Portal to get a Move-Out Notice form. The Taft requires our residents to provide a 60 day written notice prior to the end of their lease. If there are questions about this please call, e-mail, or stop by the office.
- By this point all air conditioners should be removed and heat should be “on and pumping”. Please let us know if you are experiencing any issues regarding the temperature in your apartment.
- If you plan on being away at any time during heating season, please be sure to leave your heat ON and windows closed. Residents are held responsible for the damages and repairs of costly frozen burst pipes!
- Please make sure to get your service requests in as early into the day as possible to ensure it is handled promptly.
- Be on the lookout for lease renewals ... Remember, the early bird catches the worm!

February is American Heart Month, and unfortunately, most of us know someone who has had heart disease or stroke. Cardiovascular disease is the leading cause of death in the United States; one in every three deaths is from heart disease and stroke, equal to 2,200 deaths per day. These conditions are also leading causes of disability preventing people from working and enjoying family activities. Cardiovascular disease is also very expensive—total heart disease and stroke hospitalizations in 2010 cost the nation more than $444 billion in health care expenses and lost productivity. Here are some very heart-healthy ways to keep heart disease and strokes at bay:

**Nutrition:** At the heart of good health is good nutrition. Find recipes, healthy cooking tips, secrets to heart-smart shopping and get your diet on the right track.

**Physical Activity:** The benefits of physical activity are solidly-proven and well documented. But many of us need some extra motivation to get moving. Take the stairs, park farther from the entrance or start a cardio program at a gym.

**Weight Management:** Losing weight usually takes effort, and keeping it off has its own set of challenges. But your small everyday choices matter! Losing as little as 5 to 10 percent of your body weight can result in better blood pressure, lower risk for diabetes and improved cholesterol levels, research shows.

**Stress Management:** Whether you’re facing crisis or simply managing the challenges of fast-paced living, you can learn to take good care of yourself and solve many of life’s problems. Don’t let stress get out of control.

**Fats & Oils:** Not all dietary fats are bad! Do you know how to select healthy fats? Eating fish twice a day may reduce your risk of heart disease by 30 percent. Omega-3 fats in fish lower triglycerides and blood pressure; they also can help prevent irregular heart rhythms.
